

Downtown Improvements Project

City of Grand Ledge, Michigan

O'Boyle, Cowell, Blalock & Associates, Inc. (OCBA) worked with Fishbeck, Thompson, Carr & Huber, Inc. (FTC&H) to prepare design and construction documents for the revitalization of downtown Grand Ledge. Streetscape improvements included new sidewalks with unique brick paver details, custom street light fixtures, brick screen walls, street trees, and a custom clock tower located at downtown's historic Opera House. OCBA also developed a coordinated signage system as part of the Phase I improvements.

Workshops were held during the design phase of this project to gather input from business owners and the public. A committee made up of citizens and members of the Downtown Development Authority (DDA) was formed to interact with the design team until the final plan was approved.
