

# Grand Rapids Streetscape Improvements

## Cherry St./Division to Commerce

O'Boyle, Cowell, Blalock & Associates, Inc. (OCBA) was retained by Fishbeck, Thompson, Carr & Huber, Inc. to assist the City of Grand Rapids Engineering Department with streetscape improvements on Cherry Street from Division Avenue to Commerce Avenue. In addition, the project included the design of a pocket park or community plaza at the northwest corner of the Division Avenue and Cherry Street intersection.

OCBA performed a site analysis of the project area, prepared concept alternatives and met with City staff and local stakeholders to review and refine the initial concepts. Preliminary plans and construction documents describing the character, materials, layout and landscaping for pedestrian lighting, sidewalks and plantings were prepared, and opinions of probable construction cost for the pocket park and streetscape improvements were prepared.
