## Kalamazoo College

### City of Kalamazoo, Michigan

Kalamazoo College retained O'Boyle, Cowell, Blalock & Associates, Inc. (OCBA) to design improvements to a 1.5-acre parcel along State Highway M-43, which had been the location of several student rental-housing properties. The goal of the college was to develop a green space with walks, lighting, and lawn areas for intramural athletics and casual use that would define the edge of campus and improve the parcel's appearance.

OCBA developed design details for the various site features including fences, walls, landscaping, irrigation and lighting, and assisted the college with obtaining a special use permit for the proposed improvements. OCBA prepared construction documents, and acted as the College's agent in the administration of the construction contract.
